

PRESS RELEASE
17 May 2011

Shenzhen office opens after Chinaplas 2011

SINGLE Temperiertchnik opens branch office in China

As of June 2011, SINGLE Temperiertchnik GmbH of Hochdorf/Germany will be present in the Chinese market with its own branch office in Shenzhen. SINGLE will offer Chinese customers a complete range of oil- and water-operated temperature control systems with a maximum heating capacity of 144 kW and for temperatures of between -40°C and +350°C. The company supports international manufacturers and OEMs as well as new customers among Chinese plastics processors with their tried-and-tested technology. At Chinaplas which takes place in Guangzhou from 17 May until 20 May 2011, SINGLE will present a cross-section of its product portfolio (German Pavilion, hall 5.1, stand A52).

By stepping up its presence in the Chinese market with a branch office, SINGLE is responding to the growing interest in its products in China, particularly in efficient high-temperature water-operated temperature control systems for plastics processing applications and ATT Alternating Temperature Technology for better-quality injection moulded parts. The new subsidiary SINGLE Temperature Controls Shenzhen Co. Ltd. provides tailor-made solutions, comprehensive engineering and a service portfolio that caters to the special requirements of the Chinese market. Experienced German engineers will support the Chinese experts.

The new branch office will offer various temperature control systems with water as a circulating medium, some of which have a wide capacity range for temperatures up to 200°C. A new, highly compact hot-water temperature control system offers customers a heating capacity of 6 kW and a flow rate of up to 30 l/min for temperatures as high as 225°C.

Variotherm ATT temperature control technology allows the optimisation of injection moulding processes with highly exacting surface-quality and dimensional stability requirements in combination with short cycle times. Thanks to fast temperature changes, ATT improves the dimensional accuracy and consistency, promotes surface properties such as self-cleaning or antireflection coatings, microstructures and nanostructures, and also facilitates the production of particularly smooth surfaces and high-grade glossy surfaces with piano finish.

The new SINGLE branch office in Shenzhen sends a signal to the Chinese growth market and enhances the specialist's existing sales and service network. A network of regional sales partners and service points as well as another subsidiary in the USA are the cornerstones of SINGLE's international presence and demonstrate its reliability as a strong partner with solutions for the most challenging temperature control processes.

In China, high-tech solutions are in demand: SINGLE hot-water temperature control system for media temperatures of up to 225°C

SINGLE in profile

SINGLE has been developing, producing and selling high-performance temperature control systems for more than forty years. The SINGLE product portfolio consists of water- and oil-operated, high-quality temperature control systems, cooling technology as well as tailor-made and customised solutions. SINGLE uses only top-quality components and materials. Long-standing customers testify to the ease-of-use and reliable operation of SINGLE systems even under a high workload.

In addition to plastics processors and manufacturers of plastics processing machines, SINGLE caters to customers from the die casting, chemical and pharmaceutical industry as well as to the metal plating industry and the food

production segment. Its systems are also used for test bench technology and many more applications.

A network of regional sales partners as well as branch offices and subsidiaries in the US and China are the cornerstones of SINGLE's international presence. Services and after-sales support on all temperature-control related matters, commissioning as well as on- and off-site training complete SINGLE's portfolio. SINGLE is certified to EN ISO 9001, has technology and manufacturer certifications that meet the European Pressure Equipment Directive (PED) and complies with standards such as UL and regional directives to CSA or GOST.

The company, which employs about 110 people at its facility in Hochdorf near Stuttgart/Germany, has been a member of Looser Holding AG, Arbon/Switzerland since 2006.
